

# DONERRE

SUSPENSION

*innovate design win*

## CARTRIDGE KIT 65

The DONERRE cartridge kit will fit in your original fork without any modifications.

This cartridge kit allows you to manage compression, rebound and preload with a big adjustment range.

The side « COMP » allows to adjust hydraulic values of compression.

The side « REB » allows to adjust hydraulic values of rebound.

Springs rate according to the pilot weight.

**Assembly:**

(See workshop manual)

**Application:**

KTM 65sx  
HUSQVARNA 65tc

**Settings:**

Adjust the preload thanks to the blue hexagonal screws

Adjust the hydraulic values (compression or rebound) thanks to the brass screws

Purge the air through the star screws
