Suter Racing testing Donerre Suspension !

In a three day test, Suter Racing Technology and several of their teams have successfully tested the Donerre Moto2 suspension.

Donerre Suspension, which is a well known name in Off-road and Rally Raid, is expanding its focus into the world of 2 wheelers.

Despite the bad weather on a big part of the test, Donerre showed to be ready for this big and new challenge.

Because of a good study and the open communication between SRT and Donerre, it was possible to offer a competitive suspension package from the first test.

The target for Donerre is to have a front runner team in the Moto2 equipped with the Zenium shock absorber and the Donerre Krypton front fork for 2011.

The next test is planned in January.
